## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☐ Responsive to communication(s) filed on 2/19/04.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3, 5-26, and 28-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson, US Patent 3,133,141, in view of Tachibana, US Patent 6,210,002. Anderson discloses the general claimed concept of a hinge connector assembly of an eye glass device, including hinge connector near 18b, hinge element 18b, a connector clamp 40, and connector means, as claimed. A tongue of the connector clamp is inherent. The ear piece 34 is inherently a skeletal structure and may be of metal material, as claimed. An indent is provided on the ear piece adjacent the connector, as seen in figure 5.

Anderson discloses the claimed invention except (1) at least one receiving notch and protruding tab, and (2) a depression and interior ridge, as claimed. Tachibana teaches the general concept of a notch 11 and tab 32b arrangement for the purpose of providing a firm alignment structure once assembled. It would have

been obvious at the time the invention was made for one skilled in the art to have included in the design of Anderson such a modification, as generally taught in Tachibana, for the purpose of providing additional structure for firm alignment.

***Allowable Subject Matter***

3. Claims 4 and 27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to teach or fairly suggest a hinge connector assembly in the entire claimed combination, including a connector clamp having a pair of spaced apart protruding tabs and a hinge connector having a pair of spaced apart notches, and the tabs engaging the notches, as claimed.
